FEATURE

Cindy Drozda

Our March demonstration will be a remote demonstration featuring Cindy Drozda. Cindy has worked with wood professionally since her first “real” job at age 19, where she taught herself to work with wood. Her elegant lidded vessels with delicate finials choreograph pure classic form with the natural grain patterns in the wood, creating a sculpture with stately presence and lively personality. She participates in exhibitions around the country, and her work has also appeared in several magazines and books. She is an active member of the American Association of Woodturners, and demonstrates her woodturning techniques at national symposiums and local clubs. She has instructional DVD/videos, and she shares her passion for woodturning around the world.

President's Corner

Steve Kellner

I guess we do have winter around here. But at least, we planned ahead for the potential of a weather related postponement and the make-up worked out as well as we could have hoped! We had to punt on Turner's Talk because the moderator was not available but we still had a good early turnout which led to lots of side-bar discussion. Over-all, we had an excellent turnout, nice collection of Show and Tell items, and an excellent presentation by Larry Yancey! Larry's presentation on converting a book into interesting turning stock was interesting, especially for those like me who have never played with epoxy. More of you should have taken Larry up on his offer to see how it turns; almost easier than wood since it has consistent 'grain' structure.

Hope to see lots of multi-axis challenge items on the 20 th !

Thanks for listening.

Steve

The estate of Carlisle Childress

has donated a substantial amount of pen turning equipment, miscellaneous kits, and supplies to the club. Most items are 10 years or more old, but still usable. There are a large number of items. There will be a "Parking Lot Sale" at the Turners Talk time during the April meeting. Look for more information coming soon.

February Demonstration

Larry Yancey demonstrated the process of laminating paper using epoxy resin to create a turning block that can stand alone to turn or be incorporated with other materials to create a blended piece. Hopefully the club will see some beautiful and creative work using this method.

TIPS AND TRICKS

Scott Synnott shared with us at the meeting his trick for maintaining the deep beautiful color of the cedar. He used Krylon clear spray. He said the he tried to degloss the piece a little with a judicious polish using 4-0 steel wool. Note that there are several variations in the Krylon clear series. He chose this one as it is advertised as interior and exterior. Although it stinks during application, it dries fast and can be lightly sanded between coats. Does not run anywhere near as bad as spray lacquer. Thank you Scott
