### FEATURE

#### Turning a Tippe Top with Neal Bland

After over 40 years of teaching mathematics at the university, I retired. I now have more time to pursue my hobby of turning wood. When making items, I often use mathematics to help design both the item and associated jigs. Items I make and sell include bowls, boxes, vases, pepper mills, spoons, spatulas, tippe tops, kururin sticks, and small animals. I am a member of the American Association of Woodturners, Golden Triangle Woodturners, Woodturners of North Texas, and

Dallas Area Woodturners. I have given more than 30 club demos, some in-person and some remotely. I have also given demonstrations at three Southwest Association of Woodturners symposiums.

### Turning Tippe Tops

In this demo, I show how to turn a tippe top that flips over when given a good spin. This is a fun project for both beginners and experienced turners, requiring only turning beads and simple hollowing. I will show what to do to insure that your tippe top will successfully flip – at least most of the time! I gave this demo at SWAT.

### President's Corner

Steve Kellner

I hope everyone learned something from last month's turner's Talk and feature presentation. The various options for signing our turnings were of definite interest to me since I'm 'penmanship challenged' in the best circumstances let alone with a wood burner! I'll consider some of the alternatives discussed.

We had a decent number of challenge entries; I'd love to see more but it's summer and time on the lathe may be tougher to come by. September's challenge is only a few months away so start thinking how you are going to 'Keep the bark' on that challenge item!

The featured presentation by Phil Rose was excellent and I know a few of you have already taken up the challenge. I haven't had much time on the lathe lately, but an offset wavy edge bowl is on my to do list!

We're going through challenging times in this country. Let's let our woodturning help keep us grounded and sane!

Thanks for listening.

Please bring and wear your badge to the meeting!

If you want one, please contact Larry Yancey, [lpancey@gmail.com](mailto:lpancey@gmail.com). The first one is free to members. There is a fee of \$10.00 to replace a lost one.

### **TOPS**

In the past Richmond Woodturners has turned hundreds of tops for the Richmond Children's Hospital. The tops are given to children receiving treatment at the hospital. Their supply is getting low and it is now time to refill it. In August, the program will be a top tuning marathon. Blanks will be supplied and members are ask to bring in their own tuning tools. Also, each member is ask to turn tops in their shops to add to the collection. It is reported that the tops are a hit with the children.

### **WIG STANDS**

Members, in corporation with the Women in Turning, are ask to make wig stands for patients at Massey Cancer Center that have lost their hair as a result of chemo-therapy. Directions for making a wig stand can be found on the Richmond Woodturners website ([www.richmondwoodturners.org](http://www.richmondwoodturners.org)) or by clicking [this link](#). Again, the patients really appreciate not only the stands, but the thought that they are cared for.

### Review of June Program

#### Turners Talk

Ron Bishop lead a discussion of signing your work. He talked about the many ways to sign your work, why it is important to do it, and what information that would be helpful to include. Very informative discussion.

#### Demonstration

Phil Rose demonstrated his technique on turning square wavy edge, textured offset bowls. His demo helped us to weave our way through a very complex turning. While I may never attempt such a project, I did learn a couple of things and it was very interesting to see how it was done. Overall, I found it to be a very worthwhile demonstration.

This box illustrates chatoyance in highly figured Hawaiian koa wood. Dimensions are 9" x 5" x 4.25" tall. It's finished with five coats of Danish Oil. At about \$150 per board foot (due to this highly figured specimen), this box made better use of the 1 board foot of koa than turning away a lot of material on the lathe. The keys and the inside bottom are walnut.
