## Tool sharpening explained

“Sharp solves more problems than force ever could. Let your edge do the work—your muscles should just be invited to the turning, not hosting it.”

This month's demonstration will focus on sharpening our lathe tools with two of our members, Jay Pugh and Steve Kellner. Each will be providing best practice techniques for several types of tools. The goal is to help our members have the sharpest tools to make the best and smoothest cuts and provide a safe tool for turning. There will be several types of sharpening stations available so you can compare the advantages and disadvantages of each.

You are encouraged to bring in some of your dull tools to be sharpened.

### President's Corner

Steve Kellner

The July meeting was everything I hoped it would be, but before getting into that, I'd like to thank Woodcraft for allowing us to use their lathes and other equipment for our turn-a-thon and everyone who spent a good portion of the afternoon preparing the Woodcraft meeting room for the event. The discussion Al Kiebert led on what is required to sell was excellent. For those thinking about joining the craft show circuit, he laid out an extensive list of things that should be addressed. And for some of us, like me, it strengthened my resolve to leave that to others!

During the business meeting, we reminded the membership that elections are coming up and that they might be contacted by the nominating committee. Dan Luttrell and Steve Owen updated us on the fair and we had a nice selection of Show & Tell entries.

But the highlight was the Turn-a-thon! While some thought the main purpose was to replenish our tops supply, that was not my main goal! Seeing experts mentor novice turners, exchange of ideas and techniques, and having discussions of a wide range of topics was what I was looking for and the fact that we turned some tops was a bonus! For me, this was one of our best meetings – and I did not turn anything! I hope everyone enjoyed it as much as I did because I'd love to see this become a regular part of our program rotation. Please share your thoughts. Thanks for reading.

Please bring and wear your badge to the meeting!

If you want one, please contact Larry Yancey, [lpYancey@gmail.com](mailto:lpYancey@gmail.com). The first one is free to members. There is a fee of \$10.00 to replace a lost one.

### Upcoming Club Board of Directors Election

Every year in November the club elects members to serve on the Board of Directors. These members with the exception of the Treasurer serve a 2 year term in their position. This year the club must elect the Vice President, Membership Director, AV Director, Webmaster and Past President 1 to a new 2 year term. The Board asked three club members to sit on a nominating committee with the responsibility to find candidates for these positions. Our committee feels that it would be good to reach out to the overall membership and ask if there is anyone that would be interested in filing one of these positions. If you are, please contact a member of the committee and let them know you are interested. The committee members are Barbara Dill (bdill6@verizon.net ), Galen Rice ([galenrice@verizon.net](mailto:galenrice@verizon.net) ) and David Bushman (dbushinan54@gmail.com). The following is a brief description of the positions up for election. A more detailed description can be found online in the club by-laws.

**Vice President-** In the absence of the President, the Vice President shall perform the duties of the President. Specific duties are primarily locate, schedule, and coordinate demonstrators and demonstrations for each of the monthly Club meetings, and special Club meetings.

**Information (Web) Director-** The primary duty of the Information Director is to develop and maintain the Club's Internet Website.

**Membership Director-** The duties of the Membership Director include greeting visitors and accept new member applications at the monthly Club meetings and collect dues from new members. They also produce and maintain the official membership roster and phone list.

**Audio/Video Director-** The Audio/Video Director include maintaining the audio/video equipment used in the performance of club programs and the operation of the audio/video equipment during club programs, or coordinate alternate trained operators. They shall also train camera and system operators as needed and periodically assess the performance of the AV system to ensure that it continues to meet the club's needs and expectations.

**Past President 1-** This Director positions shall be filled by willing past presidents of the Club.

## Community Service Project Opportunities

### WIG STANDS

Members, in corporation with the Women in Turning, are ask to make wig stands for patients at Massey Cancer Center that have lost their hair as a result of chemo-therapy. Directions for making a wig stand can be found on the Richmond Woodturners website ([www.richmondwoodturners.org](http://www.richmondwoodturners.org)) or by clicking [this link](#). Again, the patients really appreciate not only the stands, but the thought that they are cared for.

Steve Kellner

Rustic birdhouse ornament, redbud branch, 8"x 3", alkyd varnish finish. Not quite what I planned after I blew out the bottom tendon while hollowing. I was able to CA glue it back, but wasn't comfortable turning it into the top finial. At least I had something to enter!

Dan Luttrell

What's a sprocket without a chain? Black Walnut and Poplar.

Steve Kellner

I didn't turn any tops during last month's meeting, so I figured I'd make up for it. Three are tippy tops that do flip but don't spin near as long as the prototype that I used as my 'cheating' model.

Steve Kellner

First attempt to make burr texturing tool: I used some bearings from old roller-skate wheels, a small magnet, and a 1/4" burr I had. The burr is not a clean single cut burr, but it works to a degree. Next version will be better!

Jerry Harvey

Attempt at texturing. Ash wood 8" diameter. Josanja highlights, texturing with Dremel bits and Manpa triangle bit on Wecheer rotary tool handpiece. Poly spray finish.

### Tip

from Dan Luttrell

Is your OneWay style tail center noisy, or have any vibration? Perhaps it needs to be rebuilt. All you need is a pair of 6202 bearings and a few simple tools for disassembly and reassembly, some of them homemade.

Loosen the brass nut with a spanner or hammer and punch. Insert the rod through the locking hole. Place the "cup" spacer over the brass nut and pull the assembly apart using a 3/4-10 nut. It may take a little coaxing. It's a tight fit. Remove the bearings (and spacers) keeping everything in the proper order. Drive the new bearings in place with the hollow bushing and retighten the brass nut.
